A Foodscape of Sunset Park

UHF Neighborhood #205 (zip codes 11220, 11232)
Includes parts of City Council Districts 38 and 39
About Foodscapes

Access to affordable and nutritious food is one of the cornerstones of good health. Without this, individuals—and communities—are at a higher risk of serious chronic diseases, including obesity, diabetes and heart disease. To improve the health of New Yorkers, we must recognize that each neighborhood has a distinct food environment.

Purpose

This Foodscape provides a community-level snapshot of that environment, including data on healthy and unhealthy food consumption, food access, and nutrition-related diseases. Additionally, the report details a sampling of the many resources available to residents within their neighborhoods to support them in eating healthier.

The Data

The data are presented by United Hospital Fund (UHF) neighborhoods, which are defined by the United Hospital Fund and consist of multiple adjacent zip codes. UHF neighborhoods are commonly used in research, including the New York City Department of Health and Mental Hygiene’s Community Health Survey.

The reports also specify the City Council Districts that are part of each UHF, and districts often span several UHF neighborhoods. Council members and residents can then view the distinct neighborhoods within their districts, to compare and contrast both the needs and assets within each area. Recognizing that UHF neighborhoods are an imperfect way to capture council districts holistically, the hope is that future updates to the reports will use data more specific to each district.
Sunset Park is primarily Hispanic.
Levels of educational attainment are generally lower in Sunset Park than New York City. Nearly one half of Sunset Park residents have less than a high school education—the highest of any UHF neighborhood—compared with 20% citywide.

In this neighborhood, nearly one third of residents live in poverty (vs. 21% citywide). The unemployment rate is similar to citywide (9% vs. 10%).
According to the 2015 U.S. Dietary Guidelines, Americans should eat five or more servings of fruits and vegetables each day.

A slightly lower percentage of Sunset Park residents are meeting this standard (8% vs. 11% in NYC). The vast majority of residents both in this neighborhood and citywide consume between one and four servings of fruits or vegetables per day.

Federal dietary guidelines also recommend limiting daily sugar intake to no more than 10% of calories—that is, no more than 12 teaspoons of sugar for a 2000-calorie-a-day diet. One 12-ounce can of soda has about 10 teaspoons of sugar, and drinking one soda each day increases a person’s risk of developing diabetes by 18%.

In Sunset Park, sugary drink intake is similar to New York City, with a slightly lower percentage of residents consuming more than one per day (21% vs. 24% citywide).
Walking distance to fresh fruits and vegetables is an indicator of access to healthy foods. Although access alone may not be sufficient to improve health, studies have found an association between better access and improved diet quality and other health indicators.3

In Sunset Park, 48% of residents live within a five-minute walk to fresh produce, similar to citywide.

Food security means having consistent access to safe, nutritious, and affordable food. The use of Supplemental Nutrition Assistance Program (SNAP) benefits, or food stamps, is an indicator of food insecurity; the majority of households that receive SNAP are food insecure.4

The U.S. Census Bureau estimates that 12.8% of all households in the United States received SNAP benefits at some point in 2015.

In Sunset Park, 30% of households receive SNAP benefits, higher than New York City overall (21%).
In Sunset Park, the prevalence of childhood obesity is the same as NYC as a whole—more than 1 in 5 children is obese. Children who are obese are more likely to remain obese as adults. When children remain obese into adulthood their risk for heart disease and other comorbidities becomes more severe.

Adult obesity in this neighborhood is also the same as citywide (24%). Obesity can lead to serious health conditions, including diabetes and heart disease.

The prevalence of diabetes is 12% in both Sunset Park and New York City overall. Uncontrolled diabetes can cause blindness, renal disease, and amputations.

A slightly lower percentage of neighborhood residents have high blood pressure (26% vs. 29% in NYC), a leading risk factor for heart disease.
Citywide Initiatives to Increase Access to Healthy Foods in **Sunset Park**

**Green Thumb Gardens**

There are over 600 GreenThumb community gardens across the city, and any resident can join a garden. In Sunset Park, there are two GreenThumb Gardens (which total more than 28,000 square feet), one of which grows food. Find the most up-to-date list of gardens using GreenThumb’s searchable Garden Map.

**Grow to Learn Gardens**

Grow to Learn NYC is a school gardens initiative that includes more than 600 registered network schools throughout the city. In Sunset Park, there are eight Grow to Learn–registered network schools. Find the most up-to-date list of school gardens using Grow to Learn’s searchable Garden Maps.

**Farmers’ Markets**

All locations, unless otherwise noted, accept SNAP/EBT.* For an updated list of farmers’ markets near you (including days/hours of operation) visit nyc.gov/health and search “farmers markets” or text “SoGood” to 877-877.

**Sunset Park Greenmarket** -- 4th Ave bet 59th & 60th Sts

**SNAP Enrollment Sites**

There are no SNAP enrollment sites in Sunset Park. The closest site is in Fort Greene.

**Fort Greene** -- 275 Bergen St, 1st Fl, Brooklyn, 11217

*SNAP is the Supplemental Nutrition Assistance Program (formerly food stamps); EBT, electronic benefit transfer.
FRESH: Zoning and Discretionary Tax Incentives

The Food Retail Expansion to Support Health (FRESH) program offers zoning and financial incentives to promote the creation and maintenance of grocery stores in underserved neighborhoods.

FRESH benefits are available to stores within designated areas; tax incentives are discretionary and available on a case-by-case basis. To receive FRESH benefits, stores must provide at least:

- 6,000 square feet of retail space for grocery products;
- 50% of a general line of food products intended for home usage;
- 30% of retail space for perishable goods; and
- 500 square feet of retail space for fresh produce.

Find out more on the nyc.gov website.

Free Summer Meals

The New York City Department of Education offers free breakfast and lunch to children ages 18 and under at more than 1,100 sites across the city throughout the summer. Food served at summer meal sites meets federal nutrition requirements and the program is fully funded by the U.S. Department of Agriculture (USDA).

Find the most up-to-date list of summer meal sites at schoolfoodnyc.org or download the free smartphone app SchoolFood: Feed Your Mind.
