A Foodscape of Chelsea/Greenwich Village

UHF Neighborhood #306/308 (zip codes 10001, 10011, 10012, 10013, 10014, 10018, 10019, 10020, 10036)
Includes parts of City Council Districts 1, 3, and 4
About Foodscapes

Access to affordable and nutritious food is one of the cornerstones of good health. Without this, individuals—and communities—are at a higher risk of serious chronic diseases, including obesity, diabetes and heart disease. To improve the health of New Yorkers, we must recognize that each neighborhood has a distinct food environment.

Purpose

This Foodscape provides a community-level snapshot of that environment, including data on healthy and unhealthy food consumption, food access, and nutrition-related diseases. Additionally, the report details a sampling of the many resources available to residents within their neighborhoods to support them in eating healthier.

The Data

The data are presented by United Hospital Fund (UHF) neighborhoods, which are defined by the United Hospital Fund and consist of multiple adjacent zip codes. UHF neighborhoods are commonly used in research, including the New York City Department of Health and Mental Hygiene's Community Health Survey.

The reports also specify the City Council Districts that are part of each UHF, and districts often span several UHF neighborhoods. Council members and residents can then view the distinct neighborhoods within their districts, to compare and contrast both the needs and assets within each area. Recognizing that UHF neighborhoods are an imperfect way to capture council districts holistically, the hope is that future updates to the reports will use data more specific to each district.
Chelsea/Greenwich Village is primarily **White**.
Levels of educational attainment in Chelsea/Greenwich Village are higher than New York City as a whole; 40% of neighborhood residents are college graduates (vs. 21% citywide).

In this neighborhood, 11% of residents live in poverty (vs. 21% citywide) and 6% are unemployed, slightly less than the citywide rate of 10%.
According to the 2015 U.S. Dietary Guidelines,\textsuperscript{1} Americans should eat five or more servings of fruits and vegetables each day.

Daily intake of fruits and vegetables is similar in Chelsea/Greenwich Village and New York City. The vast majority of individuals, both in this neighborhood and citywide, consume between one and four servings of fruits or vegetables per day.

Federal dietary guidelines also recommend limiting daily sugar intake to no more than 10\% of calories—that is, no more than 12 teaspoons of sugar for a 2000-calorie-a-day diet. One 12-ounce can of soda has about 10 teaspoons of sugar, and drinking one soda each day increases a person’s risk of developing diabetes by 18\%.\textsuperscript{2}

The majority (56\%) of Chelsea/Greenwich Village residents consume no sugary drinks, higher than citywide (45\%). In this neighborhood, 13\% of residents drink one or more sugary beverages daily, lower than New York City as a whole (24\%).
Walking Distance to Fresh Fruits and Vegetables

- **74%** live **5 minutes or less**
  - 49% citywide

- **11%** live **between 5-10 minutes**
  - 18% citywide

- **15%** live **10 minutes or more**
  - 32% citywide

Access to Healthy Food and Food Security in **Chelsea/Greenwich Village**

Walking distance to fruits and vegetables is an indicator of access to healthy foods. Although access alone may not be sufficient to improve health, studies have found an association between better access and improved diet quality and other health indicators.³

In Chelsea/Greenwich Village, the majority (74%) of residents live within a five-minute walk to fresh produce, compared to 49% citywide.

Food security means having consistent access to safe, nutritious, and affordable food. The use of Supplemental Nutrition Assistance Program (SNAP) benefits, or food stamps, is an indicator of food insecurity; the majority of households that receive SNAP are food insecure.⁴

The U.S. Census Bureau estimates that 12.8% of all households in the United States received SNAP benefits at some point in 2015.

In Chelsea/Greenwich Village, only 8% of households receive SNAP benefits, lower than New York City as a whole (21%).
In Chelsea/Greenwich Village, the prevalence of childhood obesity is lower than New York City as a whole—12% of children are obese (vs. 21% citywide). Children who are obese are more likely to remain obese as adults. When children remain obese into adulthood their risk for heart disease and other comorbidities becomes more severe.

Adult obesity in this neighborhood is also lower than citywide (9% vs. 24%). Obesity can lead to serious health conditions, including diabetes and heart disease.

Diabetes prevalence in Chelsea/Greenwich Village is less than half that of New York City overall (5% vs. 12%). Uncontrolled diabetes can cause blindness, renal disease, and amputations.

Additionally, a lower percentage of neighborhood residents have high blood pressure (17% vs. 29% in NYC), a leading risk factor for heart disease.
Citywide Initiatives to Increase Access to Healthy Foods in Chelsea/Greenwich Village

GreenThumb Gardens
There are over 600 GreenThumb community gardens across the city, and any resident can join a garden. In Chelsea/Greenwich Village, there are four GreenThumb Gardens (which total more than 30,000 square feet), all of which grow food. Find the most up-to-date list of gardens using GreenThumb’s searchable Garden Map.

Grow to Learn Gardens
Grow to Learn NYC is a school gardens initiative that includes more than 600 registered network schools throughout the city. In Chelsea/Greenwich Village, there are 16 Grow to Learn–registered network schools. Find the most up-to-date list of school gardens using Grow to Learn’s searchable Garden Maps.

**FRESH: Zoning and Discretionary Tax Incentives**

The Food Retail Expansion to Support Health (FRESH) program offers zoning and financial incentives to promote the creation and maintenance of grocery stores in underserved neighborhoods.

FRESH benefits are available to stores within designated areas; tax incentives are discretionary and available on a case-by-case basis. To receive FRESH benefits, stores must provide at least:

- 6,000 square feet of retail space for grocery products;
- 50% of a general line of food products intended for home usage;
- 30% of retail space for perishable goods; and
- 500 square feet of retail space for fresh produce.

Find out more on the nyc.gov website.
The New York City Food Policy Center at Hunter College develops intersectoral, innovative and evidence-based solutions to preventing diet-related diseases and promoting food security in New York City and beyond. The Center works with policy makers, community organizations, advocates, and the public to create healthier, more sustainable food environments and to use food to promote community and economic development. Through interdisciplinary research, policy analysis, evaluation, and education, we leverage the expertise and passion of the students, faculty and staff of Hunter College. The center aims to make New York a model for smart, fair food policy.
